Citation Metrics

- Citation metrics measure the reuse of research within the ***published academic community*** .
- 'Quality' is assumed by the understanding that have had an *impact* upon the research that cited them.

Citation Metrics

- **Impact Factor***: the average number of citations received by articles published in the journal within a two-year window.
- **Impact Factor Best Quartile***: the journal's highest subject category ranking in the Journal Citation Reports. Q1 = 25% of journals with the highest Impact Factors.
- **5 Year Impact Factor***: the average number of citations received by articles in the journal within a five-year window.
- **CiteScore†**: the average number of citations received by articles in the journal over a four-year period.
- **SNIP (Source Normalized Impact per Paper)**: the number of citations per paper in the journal, divided by citation potential in the field.
- **SJR (Scimago Journal Rank)**: Average number of (weighted) citations in one year, divided by the number of articles published in the journal in the previous three years.

Measuring Your Impact: Impact Factor, Citation Analysis, and other Metrics: Citation Analysis

Overview of h-index, Eigenfactor, Impact Factor (IF), Journal Citation Reports, Citation Analysis, and other tools.

Measuring Your Impact | Citation Analysis | Find Your H-Index | Other Metrics/ Altmetrics | Journal Impact Factor (IF) | Selecting Publication Venues

About Citation Analysis

What is Citation Analysis?

The process whereby the impact or "quality" of an article is assessed by counting the number of times other authors mention it in their work.

Citation analysis invovles counting the number of times an article is cited by other works to

About the H-index

The h-index is an index to quantify an individual's scientific research output (J.E. Hirsch)
The h-index is an index that attempts to measure both the scientific productivity and the apparent scientific impact of a scientist. The index is based on the set of the researcher's most cited papers and the number of citations that they have received in other people's

Journal Finder

JournalFinder

Find journals

Enter title and abstract of your paper to easily find journals that could be best suited for publishing. JournalFinder uses smart search technology and field-of-research specific vocabularies to match your paper to scientific journals.

> More on how it works

Find the perfect journal for your article

Elsevier® JournalFinder helps you find journals that could be best suited for publishing your scientific article. Please also consult the journal's Aims and Scope for further guidance. Ultimately, the Editor will decide on how well your article matches the journal.

Powered by the Elsevier Fingerprint Engine™, Elsevier JournalFinder uses smart search technology and field-of-research specific vocabularies to match your article to Elsevier journals.

Simply insert your title and abstract and select the appropriate field-of-research for the best results.

If you would like to learn more about how JournalFinder works, please check out our FAQ page.

PSYCHOLOGICAL FACTORS RELATED TO ELECTRIC SAFETY BEHAVIOR OF ADULTS IN THE WORKPLACE

Paper abstract

Don't have an abstract?

This thesis aimed to compare the electric safety behavior of adults in the workplace and classified according to minor variables such as gender, education level, marital status, and working period for a study on involvement on the electric safety behavior of adults in the workplace such as locus of control, achievement motivation, internal locus of control and moral disengagement. To predict the electric safety behavior of adults in the workplace, the situation factors variable in the collective group was used. Following the classification of minor variables, the participants were 400 people, aged 21-60 years old, randomly selected and classified by education level and gender. This study used the stratified random sampling method, the t-test, Pearson's product moment correlation coefficient and multiple regression analysis.

The results of the study were as follows: (1) adults in the workplace with a Bachelor's or a Postgraduate degree have higher procedures, methods and processes for electric safety behavior than undergraduates; (2) adults in the workplace with less than five years of work experience had overall electric safety behavior, higher procedures, methods and processes and the selection of electrical equipment for safe electrical usage behavior, which was lower than adults in the workplace with more than 10 years of work experience with a statistical significance of 05; (3) the three psychological variables included locus of control, achievement motivation and internal locus of control had a positive correlation with both overall and individual factors for electric safety behavior on higher procedures, methods and processes; the selection of electrical equipment and the use of electrical safety devices correctly had a statistical significance of .01, based on the research hypotheses 5-7; except for moral disengagement, which the results showed a negative correlation in both overall and individual factors for

Browse, search, and explore journals indexed in the Web of Science
The Master Journal List is an invaluable tool to help you to find the right journal for your needs across multiple indices hosted on the Web of Science platform. Spanning all disciplines and regions, Web of Science Core Collection is at the heart of the Web of Science platform. Curated with care by an expert team of in-house editors, Web of Science Core Collection includes only journals that demonstrate high levels of editorial rigor and best practice. As well as the Web of Science Core Collection, you can search across the following specialty collections: Biological Abstracts, BIOSIS Previews, Zoological Record, and Current Contents Connect, as well as the Chemical Information products.

Improved Citescore

We have updated the CiteScore methodology to ensure a more robust, stable and comprehensive metric which provides an indication of research impact, earlier. The updated methodology will be applied to the calculation of CiteScore, as well as retroactively for all previous CiteScore years (ie. 2018, 2017, 2016...). The previous CiteScore values have been removed and are no longer available. View CiteScore methodology. >
